MOUNTING INSTRUCTIONS:

1. Secure metal brackets to wall using screws and plugs supplied, ensuring distance between them is correct. Do not tighten screws yet.
2. To test positioning, gently push shelf onto brackets. If correct, remove shelf, tighten screws and mount shelf back onto brackets.
3. Use heavy duty screws and plugs for extra strength.

Tip for easy bracket positioning:

Decide on shelf position, then fix only one bracket to wall. With the other bracket protruding halfway out of shelf, gently push shelf onto secured bracket. Using a spirit level on top of shelf, mark wall where second bracket should be secured. Secure second bracket and mount shelf.

ALL MOUNTING COMPONENTS INCLUDED IN PACK
